

The Patient Whistle

- 1. The patient whistle is needed when you process the play from the start, the development and the finish.**
- 2. Always assess the whole play and decide to make a decision on the play or not.**

The Cadence Whistle

- 1. Let your partner go first when calls are in their primary.**
- 2. When you come out of your primary, be sure you have an open angle, and you have a correct call that helps the game.**

The Immediate Whistle

- 1. The immediate whistle is when you blow the whistle right away.**
- 2. Elbowing fouls, blows to the head or when the action is rough or escalating, the immediate whistle is needed.**
